Professional Summary

Senior Linux & DevOps Engineer with 9+ years of experience managing, troubleshooting, and optimizing enterprise-scale infrastructure. Hands-on expertise in Red Hat OpenShift administration, performance tuning, resource management, and production issue resolution. Strong Linux administration experience across RHEL 6/7/8/9, Ubuntu, and CentOS on physical and virtual servers. Skilled in networking, CEPH/NFS storage, automation, and hardware management, ensuring high availability and operational excellence.

Core Skills

OpenShift Administration & Troubleshooting | Kubernetes | Docker | Cluster Performance Tuning
Linux Administration (RHEL, Ubuntu, CentOS) | OS Installation | Kernel Tuning | LVM | File Systems
Networking: TCP/IP, IPv4/IPv6, VLAN, Routing, iptables, OS Firewall | DNS | DHCP
Storage: NFS | Hardware: iLO, iDRAC
Automation: Bash, Ansible | CI/CD: Jenkins, Git/Bitbucket, Nexus, SonarQube
Monitoring: Nagios XI, ELK | Virtualization: RHV, VMware | Cloud: AWS

Professional Experience

Tech Mahindra | Aug 2021 – Present

Tech Lead – Linux & DevOps Engineer

- Administer and troubleshoot Red Hat OpenShift production clusters, including pod, node, networking, and storage-related issues.
- Led OpenShift Container Platform upgrades (4.10 → 4.18) across production environments, achieving 99.9% uptime with zero rollback.
- Optimized cluster performance and resource utilization, resolving CPU, memory, and storage bottlenecks.
- Installed, upgraded, and Supported RHEL 7/8/9 systems on physical and virtual infrastructure.
- Administered Red Hat Satellite Server for patching, repository, and lifecycle management.
- Administered NFS-backed persistent storage for OpenShift workloads.
- Installed and supported Red Hat EAP and JBCS application platforms.
- Designed and maintained CI/CD pipelines using Jenkins, Bitbucket, SonarQube and Nexus.
- Automated operational tasks using Bash scripting and Ansible, improving reliability and reducing manual effort.
- Enforced security hardening, firewall rules, and SELinux policies to meet compliance requirements.
- Administered Red Hat Virtualization (RHV/RHVE) environments including VM lifecycle operations.
- Monitored systems using Nagios XI and ELK Stack.
- Executed hardware troubleshooting and remote management using iLO and iDRAC.

Environment: RHEL, OpenShift, Kubernetes, AWS, Jenkins, Ansible, NFS, ELK, RHV

Capgemini Technology Services India Limited | Dec 2018 – Aug 2021
Associate Consultant – Linux Administrator

- Administered enterprise Linux environments (RHEL, CentOS, SUSE, Ubuntu) in 24×7 L1/L2/L3 support operations.
- Led Global Command Center activities, handling production incidents, escalations, and service restoration for critical systems.
- Supported large-scale hybrid infrastructure integrating Linux, AWS, DevOps tools, and SAP systems.
- Performed advanced Linux troubleshooting for performance, filesystem, networking, and service-related issues.
- Executed Linux OS installation, configuration, decommissioning, and patch management using Red Hat Satellite.
- Automated routine operational tasks and backups using Bash shell scripting.
- Supported LVM, disk, filesystem, process, and user administration across enterprise servers.
- Applied OS security hardening using firewalld, iptables, SELinux, and TCP wrappers.
- Configured and troubleshot Linux networking, including bonding/teaming, DNS, VLANs, and IP management.
- Configured VM lifecycle operations (creation, modification, deletion) on VMware platforms.
- Administered server and database backups at OS level and ensured data integrity.
- Coordinated with vendors and stakeholders during major incidents and remote site activities.
- Ensured SLA compliance, service quality, and customer satisfaction through effective delivery management.

Environment: RHEL, CentOS, SUSE, Ubuntu, VMware, AWS, DevOps Tools

---

Simple Logic IT Pvt. Ltd | Apr 2018 – Dec 2018
Executive System Administrator

- Supported enterprise projects including SBI UPI Server, Maha Transco (Airoli), and Tribhovandas Bhimji Zaveri Pvt. Ltd.
- Performed RHEL installation, system hardening, and repository configuration.
- executed backup solutions and provided client-specific server support.
- Monitored server health and ensured policy compliance.

T&M Services Consulting Pvt Ltd | May 2016 – Mar 2018
Linux and Network Administrator

- Maintained Linux systems and LAN infrastructure within the BARC campus.
- Installed, configured, and managed various Linux OS versions and virtualization solutions.
- Configured Layer 2/3 switches and maintained firewall rules per organizational policies.
- Observed network performance and resolved system issues using SNMP Manager.
- Managed file transfers, backups, and user accounts, ensuring operational efficiency.

Education

Degree: Electronics and Telecommunication, Vidyalankar Institute of Technology, Mumbai University (2014-2015)
Diploma: Electronics and Telecommunication, Vidyalankar Polytechnic, MSBTE (2011-2012)
SSC: Secondary School Certificate, D.S. High School, Maharashtra State Board (2008)

Certifications

- AWS Certified Solutions Architect – Associate (Sep 2023)
- Red Hat Certified System Administrator (Dec 2017)
- Red Hat Certified Engineer (Feb 2018)

Achievements

- Awarded “Pat on the Back” (Sep 2024)
- Awarded “BRAVO” (Mar 2024)
- Awarded “Extra Mile Employee” (Dec 2019)
